

POWERED BURNER MODELS LARGE-VOLUME POWERED BURNER FEATURES

The large-volume powered burner line includes the largest, most powerful A. O. Smith tank-type gas water heaters. With tank capacities up to 600 gallons and firing capacities up to 2.5 million BTUs per hour, these large-volume high-output water heaters are capable of producing over 3,000 gallons (GPH) of hot water per hour at an 80°F rise. These heavy-duty industrial-grade water heaters are designed and built to handle the most demanding hot water heating requirements of large commercial and industrial users.

POWERED GAS BURNER

- Suitable for natural or propane gas
- Electronic flame safeguard control with intermittent spark ignition
- Main and pilot automatic gas valves with gas pressure regulators
- Diaphragm air switch for proof of blower operation
- Flame inspection port

FULLY AUTOMATIC CONTROLS WITH SAFETY SHUTOFF

- High-temperature limit control (manual reset)
- CSA certified and ASME rated T&P relief valve
- Hinged-door control compartment for easy access
- Upper and lower thermostats for accurate temperature control
- Standard control is for 120°-180°F water service
- Factory-installed low-water cutoff

BLUE DIAMOND® GLASS LINING

- Proprietary A. O. Smith glass lining provides superior coverage and unmatched durability
- Equipped with multiple anode rods for additional corrosion protection

HEAVY-DUTY JACKET

- Heavy-gauge steel jacket with baked powder-coated finish for durability
- Two 3" handhole inspection openings

MAXIMUM HYDROSTATIC WORKING PRESSURE

- All models: 160 psi

PROFESSIONAL START-UP SERVICE

- **FACTORY START-UP INCLUDED**
 - Required for activating warranty and assuring maximum operating performance. Contact your local sales representatives or Authorized Start-Up Agent to arrange a FREE certified start-up.
- Assures proper installation and adjusts burner for clean combustion and most efficient operation

CODES AND STANDARDS

- Design-certified by UL (Underwriters Laboratories), according to ANSI Z21.10.3-4.3 CSA Standards
- Meets the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1

OPTIONAL LOW NO_x BURNERS

- Low NO_x burners from 400,000 BTUH up to 2 million BTUH
- Complies with Texas Low NO_x and Air Quality Management Districts with requirements of less than 30 ppm

MODELS BTP 150-140 through BTP 600-2500

† in column "H" indicates models equipped with "Wayne" burners.
 All other "H" dimensions are for models equipped with "Power Flame" Power Burner.
 Certified Minimum Installation Clearances to Combustibles:
 Front: 18 inches
 Back: 0 inches
 Sides: 0 inches
 Top: 5 inches
 A clearance of 24 inches is recommended from serviceable parts such as relief valve, power burner, drain valve and anodes (anodes are located on side above cold water inlet).
 Minimum gas supply pressure: 7 inches W.C.
 Maximum gas supply pressure: 13 inches W.C.
 BTP models are Category I appliances (Fan Assisted) and require a negative draft. These units should only be commonly vented with other Category I negative draft appliances per the latest addition of the National Fuel Gas Code. An approved/listed Type "B" venting material is recommended. A negative draft of -0.02" to -0.07" is required in the vent.

HIGH-VOLUME POWERED BURNER

THREE-YEAR LIMITED TANK WARRANTY

- **FACTORY START-UP REQUIRED** - Included for activating warranty and assuring maximum operating performance. Contact your local sales representative or Authorized Start-Up Agent to arrange a FREE certified start-up.
- For complete information, consult written warranty or contact A. O. Smith

OTHER BTP FEATURES:

- **TWO LAYERS OF HIGH-TEMPERATURE CERAMIC FIBER INSULATION IN COMBUSTION CHAMBER**
- **FLAME INSPECTION PORT OPENING**
- **MOUNTED ON RUGGED CHANNEL IRON SKIDS**
- **NATIONAL BOARD STAMPING**
- **ASME-RATED TEMPERATURE AND PRESSURE GAUGE**
- **LOW-WATER CUTOFF**
- **CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE**
- **BAROMETRIC DRAFT REGULATOR**
- **120-VOLT CONTROL CIRCUIT**
- **DRAIN VALVE**
- **180°F WATER SERVICE THERMOSTATS**

BTP OPTIONS:

- **FACTORY MUTUAL APPROVED CONTROL ARRANGEMENT**
- **HIGH OR LOW WATER PRESSURE CONTROL**
- **CSA CERTIFIED AND ASME RATED T&P RELIEF VALVE**
- **MODULAR GRAPHIC BURNER SYSTEMS MANAGEMENT ON HEATERS WITH 270,000 BTU INPUT AND OVER**
- **LOW-NOX BURNER**

OPTIONAL LOW NO _x BURNERS		BTPN/NMPR MOTOR HP
Available Low NO _x Burner BTU Input Sizes (Nat. Gas Only)	BTUH	1/4 HP
	400,000	1/4 HP

	2,000,000	

Add N to Model Number for low NO_x Burner.
 Example: BTPN-150-720

HIGH-VOLUME POWERED BURNER

SUGGESTED SPECIFICATION

Gas water heater(s) shall be A. O. Smith model BTP _____, with a storage capacity of _____ gallons, an input rating of _____ BTU/hr and a recovery rating of _____ gallons per hour (gph) at a temperature rise of 100°F. Maximum gas supply pressure to heater(s) shall be 13" W.C., and ASME working pressure shall be 160 psi.

The tank shall be glasslined with alkaline borosilicate composition and fused to the steel by firing at 1600°F, and shall be insulated with fiberglass insulation. The heater will also be equipped with multiple anodes for cathodic protection. Heater(s) shall be equipped with _____ NPT water inlet and outlet openings, and two 3" handhole cleanouts. The heater(s) shall be constructed in accordance with ASME code, and the entire unit listed by Underwriters Laboratories.

Heater(s) shall be equipped with a powered gas burner with electronic flame safeguard, intermittent electronic ignition, main and pilot automatic gas valves, redundant solenoid gas valve, gas pressure regulator, diaphragm switch for proof of boiler operation, and flame inspection port.

Controls and other components shall include manual-reset high-temperature limit control, upper and lower thermostats, combination temperature and pressure gauge, low-water cutoff, CSA certified and ASME rated T&P relief valve, drain valve and draft regulator. Control compartment door shall be hinged for easy access.

The heater(s) shall meet the thermal efficiency and standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1. The tank shall have a 3-year limited warranty against failure as outlined in the written warranty. Professional start-up service shall be included and is required to activate warranty.

Professional Start-Up Included - required for activating warranty and assuring maximum operating performance.
